**Dialogue 3: Ongoing Rounds & Medication Administration**

*(During the shift, RN Felicia rounds on her patients. Patient Andrew complained of chest pain earlier, and Felicia has placed Andrew on oxygen and a cardiac monitor, performed an EKG, drawn blood for a STAT cardiac panel, and requested a chest X-ray, according to Doctor's order. Now Felicia is in Room 3 with patient Andrew. She treats him according to the Hospital's nursing protocols for patient with an Acute Coronary Syndrome.)*

Felicia: \_\_\_\_\_

Andrew: OK.

Felicia: \_\_\_\_\_

*(Felicia gives an aspirin to Andrew.)*

Felicia: \_\_\_\_\_

*(Felicia administers nitroglycerin spray for Andrew.)*

Felicia: \_\_\_\_\_

Andrew: No.

Felicia: \_\_\_\_\_

Andrew: Still a nine.

Felicia: *(After 5 minutes)* \_\_\_\_\_

Andrew: OK.

*(After 3 sublingual nitroglycerin sprays, Andrew's pain is unchanged.)*

Felicia: \_\_\_\_\_

---

Andrew: I hope that will work.

*(Felicia administers 2 mg of morphine sulfate IV.)*

Felicia: (After checking the blood pressure)

Andrew: OK. What were the results of the tests?

Felicia:

Andrew: No more pills to take!

Felicia:

Andrew: Well...

Felicia:

Andrew: OK.

Felicia:

Andrew: I no longer feel pain.

Felicia:

Andrew: I will. Thank you, Felicia.

Felicia:

*(Felicia leaves the room.)*
